

ABOUT THE HUNT

To us hunting is not about finding an animal that qualifies as a trophy as fast as possible and shooting it, just to have one more on our wall. To us hunting is about the experience, the valuable time you spend in nature, seeing the animals in their natural terrain, learning about their struggle for live, their unbelievable toughness, their beauty and passing it on to the generations to come.

We believe you as hunter feel the same and would like to share this unique experience with you!

WHAT TO EXPECT

Once you land at the airport, your transfer will be waiting to pick you up and transport you to the lodge. This drive will usually take about two hours.

After which you will be welcomed at Africa Awaits Lodge and get to meet the people that will take care of you for the rest of the hunt. On the first day you will get the opportunity to sight in your rifle at the shooting range and to rest from the long travel.

A TYPICAL HUNTING DAY

After a good night rest a hearty breakfast and coffee will be enjoyed and the plans for the day will be discussed. Your hunting vehicle and PH will be waiting for you and will take you to the hunting area you will be hunting for the day. You will be driving around in a well-equipped 4x4 vehicle until game, or signs of game, is spotted. Once any of these two is spotted, you and your PH will get off the car and continue the stalk by foot.

You will stalk according to your fitness level and preference and your PH will inform you when you are in a shooting position. During the stalk, your PH will bring you between 80 and 200 yards from your trophy. Shooting sticks (a rest for your rifle in order to ensure a stable position for you to shoot from) will then be set up, he will move in behind you and assist you in finding your trophy. Once you notify your PH that the animal is in sight, you will get clear directions when to take the shot.

If you have been successful in the shot and the PH is confident that the animal is dead, you will move to your trophy. After all the excitement the photographs will be taken and the hunting vehicle will pick you and your trophy up. If however the animal was wounded, your PH will do his utmost best in tracking and locating the animal as soon as possible.

Once back at the lodge, the animal will be offloaded and skinned by the professional skinning team according to your instructions. All your trophies will be tagged and transported to the taxidermy free of cost after the hunt. Once your safaris is finished you will be transported back to the airport for your flight.

HUNTING METHODS & RIFLES

The Lodge is situated in the Eastern part of Namibia, close to Gobabis, in the Kalahari. The hunting area is 75 000 hectares and most of the game are free ranging, but there is also large high fenced areas where a larger variety of game can be hunted.

We believe in fair-chasse methods and hunt mostly free-roaming animals, to give each hunter the true African experience and each animal a fair chance. From rocky areas where Mountain Zebra, Greater Kudu and baboon can be found until sandy areas where Oryx, Springbuck, Waterbuck and Giraffes are located, this beautiful country not only gives spectacular views, but also a great variety of natural habitats for all the game species. The animals are located while cruising in a hunting-vehicle, thus a large area can be covered without losing valuable time walking through dead terrain.
